

WINDSOR

Ingeniously disguising the pre-heat mechanism for the airflow to the gas mantles inside its decorative chimney, the original 'Windsor' lantern was the high-tech lighting solution of its day. Designed for high ingress protection, easy maintenance and award-winning optical performance, the DW Windsor interpretation is as advanced for its time as its Victorian forbear and preserves the elegance of the original.

APPLICATIONS

Ideal for main roads to car parks and city centres

SPECIFICATION

7W-70W

High performance LUXEON TX LED technology
